TANGENT EVO – WHEN SOUND AND SIZE MATTERS..!

Tangent EVO are trendy colourful mini HiFi loudspeakers that will fit any room and interior décor in your home.

Tangent EVO is designed and engineered to deliver performance of large loudspeakers in the smallest possible design. In spite of its small size - it measures only 19 x 13 x 16 cm – Tangent EVO will fill any moderately sized room with precise and large scale music with an amazing bass response. Tangent engineers have used the latest loudspeaker driver technology, a die cast aluminium frame and large shielded magnets for the woofer and neodymium magnets for the 25mm soft dome tweeter, to ensure and deliver the surprising sound pressure level.

Tangent EVO are standard equipped with a flush mount wall bracket, and accessory mounting brackets allow each Tangent EVO to be angle mounted from your ceiling and walls or elegantly displayed on speaker stands.

FEATURES

- AMAZING SOUND
- COMPACT CABINET
